

WOULD YOU LIKE A SMILE MAKEOVER?

Smiling is a great way to stand out in a crowd; it draws people to you and makes an important statement about you. It says you are happy, confident and attractive. Smiling also lifts the face making you look younger and feel better. Yet many people avoid smiling because they are self conscious about the appearance of their teeth, and may hold their hand in front of their mouth when smiling or laughing, or develop a closed lip smile; to avoid showing their teeth.

Being unhappy with the way you look is a very disheartening and common problem and can have a dramatic effect on your life. Research has shown that an attractive smile often goes hand in hand with a successful personal and professional life.

In a recent survey:

OVER 75% OF PEOPLE DON'T FEEL CONFIDENT TO SMILE IN A PHOTOGRAPH

OVER 45% OF PEOPLE MAKE JUDGEMENTS ABOUT PEOPLE BY THE LOOK OF THEIR SMILE

OVER 75% OF PEOPLE THINK THAT A BEAUTIFUL SMILE HELPS PEOPLE PSYCHOLOGICALLY

OVER 65% OF PEOPLE THINK THAT AN ATTRACTIVE SMILE HELPS ROMANTICALLY

Studies agree that a smile is usually the most important and best remembered feature when we meet a new person. So if you are concerned about the impact your smile is having on first impressions, such as at a job interview, business meeting or when meeting a romantic candidate a smile makeover may be the answer.

A smile makeover doesn't just transform your mouth it changes your life!
